

Software Development Internships

Enterprise Systems Solutions is looking for interns who are interested in starting their careers working in all aspects of Software Development. These are internships, part-time positions that offer a priceless opportunity to gain experience in the field of software development. We have positions for Programmers, QA Testers, Graphics Artist and Documentation Specialists. These positions are primarily geared to those who have recently graduated and/or have 1-2 years of software development experience.

You will gain invaluable experience and knowledge working with experience S/W engineers and managers to assist in your career goals. Previous interns who have worked for us have made successful steps up the ladder with Fortune 500's, others with startups, etc. We will be giving you job references after completing 3-6 month internships with Enterprise Systems Solutions. Positions are located in the San Mateo, CA.

Programmers/Software Developers: Should have the ability to program in Oracle Developer 2000 Forms/Reports and/or some other GUI Based programming tool such as VB/PowerBuilder and be familiar with PL/SQL and Oracle RDBMS.

QA Testers: Should have the ability to learn software testing techniques, be able to learn client-server and/or web based software, must have an inquisitive interest on how software works.

Documentation Specialists: Creating manuals, tutorials, and technical documentation.

Graphics Designer: seeking a Graphic Designer to join our growing dynamic marketing team. You will be responsible for web design, layout and all graphical designs for marketing and promotional materials.

Must have advanced skills and working knowledge of FrameMaker, Adobe Photoshop and Illustrator, DreamWeaver, Adobe Go-Live, PowerPoint, MS Office Suite at minimum. Please list all relevant skills on your resume. 1+ years of work experience as a Graphic Designer, Graphic designer Assistant, or heavy involvement in graphics within a marketing department is preferable.

Requirements: All internships require English language skills (written and verbal); previous knowledge of computers and aptitude for learning different software packages; strong work ethic; friendly, helpful team-oriented disposition; and a genuine interest in the field of software development.

Since these are true internships, we are trading off teaching you value skills (both technical and professional) for non-salaried positions.

Interested Candidates: Please send your resumes to: jobs@essglobal.us.
